Government Obligations Fund

Investment Objective

Government Obligations Fund's objective is to seek maximum current income to the extent consistent with the preservation of capital and maintenance of liquidity.

Fees and Expenses

The following tables describe the fees and expenses that you may pay if you buy and hold shares of the fund.

Shareholder Fees <i>(fees paid directly from your investment)</i>	Class A
Maximum Sales Charge (Load)	None
Maximum Deferred Sales Charge (Load)	None
Annual Low Balance Account Fee <i>(for accounts under \$1,000)</i>	\$15
Annual Fund Operating Expenses <i>(expenses that you pay each year as a percentage of the value of your investment)</i>	
Management Fees	0.10%
Distribution and/or Service (12b-1) Fees	0.25%
Other Expenses:	
Shareholder Servicing Fee	0.25%
Miscellaneous	0.18%
Total Annual Fund Operating Expenses	0.78%

Example: This example is intended to help you compare the cost of investing in the fund with the cost of investing in other mutual funds. The example assumes that you invest \$10,000 in the fund for the time periods indicated and then redeem all of your shares at the end of those periods. The example also assumes that your investment has a 5% return each year and the fund's operating expenses remain the same. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

	Class A
1 year	\$ 80
3 years	\$249
5 years	\$433
10 years	\$966

Principal Investment Strategies

Government Obligations Fund invests exclusively in short-term U.S. government securities, including repurchase agreements secured by U.S. government securities. U.S. government securities are bonds or other debt obligations issued or guaranteed as to principal and interest by the U.S. government or one of its agencies or instrumentalities. U.S. Treasury securities and some obligations of U.S. government agencies and instrumentalities are supported by the "full faith and credit" of the U.S. government. Other U.S. government securities are backed by the right of the issuer to borrow from the U.S. Treasury. Still others are supported only by the credit of the issuer or instrumentality.

When selecting securities for the fund, the portfolio managers first consider general economic factors, market conditions, and the short-term interest rate environment in determining what types of short-term instruments to purchase. The portfolio managers then select the specific instruments to be purchased. Generally, the portfolio managers buy and hold securities until their maturities. However, the portfolio managers may sell securities for a variety of reasons, such as to adjust the portfolio's average maturity or to shift assets into and out of higher-yielding securities.

Principal Risks

An investment in the fund is not a deposit of U.S. Bank National Association and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other governmental agency. Although the fund seeks to preserve the value of your investment at \$1.00 per share, it is possible to lose money by investing in the fund.

Government Obligations Fund *continued*

Principal risks of investing in this fund include:

Credit Risk — The value of your investment might decline if the issuer of an obligation held by the fund defaults on the obligation or has its credit rating downgraded.

Income Risk — The level of income you receive from the fund will be affected by movements in short-term interest rates. Because the fund invests solely in U.S. government securities and repurchase agreements secured by those securities, the fund may offer less income than money market funds investing in other high-quality money market securities.

Interest Rate Risk — The value of your investment might decline because of a sharp rise in interest rates that causes the value of the fund's portfolio holdings to fall.

Liquidity Risk — The fund may not be able to sell a security in a timely manner or at a desired price, or may be unable to sell the security at all, because of a lack of demand in the market for the security.

Redemption Risk — If there are unexpectedly high redemptions of fund shares, the fund might have to sell portfolio securities prior to their maturity, possibly at a loss.

Repurchase Agreement Risk — If the seller of a repurchase agreement defaults on its obligation to repurchase securities from the fund, the fund may incur costs in disposing of the collateral and may experience losses if there is any delay in its ability to do so.

Fund Performance

The following bar chart and table provide some indication of the potential risks of investing in the fund. The fund's past performance is not necessarily an indication of how the fund will perform in the future. Updated performance information is available online at firstamericanfunds.com or by calling 800 677-3863.

The bar chart shows you the variability of the fund's performance from year to year. The table illustrates the fund's average annual total returns over the time periods indicated.

AVERAGE ANNUAL TOTAL RETURNS AS OF 12/31/09	Inception Date	One Year	Five Years	Since Inception
Government Obligations Fund	9/24/01	0.02%	2.61%	1.92%

¹ Total return for the period 1/1/10 through 9/30/10 was 0.00%.

Prime Obligations Fund

Investment Objective

Prime Obligations Fund's objective is to seek maximum current income to the extent consistent with the preservation of capital and maintenance of liquidity.

Fees and Expenses

The following tables describe the fees and expenses that you may pay if you buy and hold shares of the fund.

Shareholder Fees <i>(fees paid directly from your investment)</i>	Class A
Maximum Sales Charge (Load)	None
Maximum Deferred Sales Charge (Load)	None
Annual Low Balance Account Fee <i>(for accounts under \$1,000)</i>	\$15
Annual Fund Operating Expenses <i>(expenses that you pay each year as a percentage of the value of your investment)</i>	
Management Fees	0.10%
Distribution and/or Service (12b-1) Fees	0.25%
Other Expenses:	
Shareholder Servicing Fee	0.25%
Miscellaneous	0.18%
Total Annual Fund Operating Expenses	0.78%

Example: This example is intended to help you compare the cost of investing in the fund with the cost of investing in other mutual funds. The example assumes that you invest \$10,000 in the fund for the time periods indicated and then redeem all of your shares at the end of those periods. The example also assumes that your investment has a 5% return each year and the fund's operating expenses remain the same. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

	Class A
1 year	\$ 80
3 years	\$249
5 years	\$433
10 years	\$966

Principal Investment Strategies

Prime Obligations Fund invests in high-quality short-term debt obligations, including:

- commercial paper.
- U.S. dollar-denominated obligations of domestic and foreign banks with total assets of at least \$500 million (including fixed and variable rate certificates of deposit, time deposits, and bankers' acceptances).
- non-convertible corporate debt securities.
- securities issued by the U.S. government or one of its agencies or instrumentalities.
- municipal securities, including variable rate demand notes, commercial paper, and municipal notes and other short-term municipal obligations.
- loan participation interests.
- repurchase agreements for the securities in which the fund may invest.

When selecting securities for the fund, the portfolio managers first consider general economic factors, market conditions, and the short-term interest rate environment in determining what types of short-term instruments to purchase. The portfolio managers then select the specific instruments to be purchased. Generally, the portfolio managers buy and hold securities until their maturities. However, the portfolio managers may sell securities for a variety of reasons, such as to adjust the portfolio's average maturity or to shift assets into and out of higher-yielding securities.

Under normal market conditions, portfolio managers will only purchase (and hold) securities in the fund if they are rated in the top short-term rating category, for example, a rating of A-1 or a rating of Prime-1. If the rating of a security is reduced below the top short-term rating category after purchase, portfolio managers will make every attempt to sell the security, unless they have determined that it would not be in the best interest of the fund to dispose of the security at that time and, where necessary, have obtained the approval of the board to continue to hold the security.

Prime Obligations Fund *continued*

The fund will limit its investments in dollar-denominated obligations of U.S. branches of foreign banks which are subject to the same regulation as U.S. banks to less than 25% of its total assets. In addition, the fund will limit its collective investments in dollar-denominated obligations of foreign branches of domestic banks (which are not subject to the same regulation as U.S. banks) and in dollar-denominated obligations of foreign banks and foreign corporations to less than 25% of its total assets.

Principal Risks

An investment in the fund is not a deposit of U.S. Bank National Association and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other governmental agency. Although the fund seeks to preserve the value of your investment at \$1.00 per share, it is possible to lose money by investing in the fund.

Principal risks of investing in this fund include:

Credit Risk — The value of your investment might decline if the issuer of an obligation held by the fund defaults on the obligation or has its credit rating downgraded.

Foreign Security Risk — Securities of foreign issuers, even when dollar denominated and publicly traded in the United States, may involve risks not associated with the securities of domestic issuers.

Income Risk — The level of income you receive from the fund will be affected by movements in short-term interest rates.

Interest Rate Risk — The value of your investment might decline because of a sharp rise in interest rates that causes the value of the fund's portfolio holdings to fall.

Liquidity Risk — The fund may not be able to sell a security in a timely manner or at a desired price, or may be unable to sell the security at all, because of a lack of demand in the market for the security, or a liquidity provider defaults on its obligation to purchase the security when properly tendered by the fund.

Municipal Security Risk — The value of municipal securities owned by the fund may be adversely affected by future changes in federal income tax laws, including rate reductions or the imposition of a flat tax, and adverse changes in the financial conditions of municipal securities issuers.

Redemption Risk — If there are unexpectedly high redemptions of fund shares, the fund might have to sell portfolio securities prior to their maturity, possibly at a loss.

Repurchase Agreement Risk — If the seller of a repurchase agreement defaults on its obligation to repurchase securities from the fund, the fund may incur costs in disposing of the collateral and may experience losses if there is any delay in its ability to do so.

Fund Performance

The following bar chart and table provide some indication of the potential risks of investing in the fund. The fund's past performance is not necessarily an indication of how the fund will perform in the future. Tax Free Obligations Fund

Investment Objective

Tax Free Obligations Fund's objective is to seek maximum current income exempt from federal income taxes consistent with the preservation of capital and maintenance of liquidity.

Fees and Expenses

The following tables describe the fees and expenses that you may pay if you buy and hold shares of the fund.

Shareholder Fees <i>(fees paid directly from your investment)</i>	Class A
Maximum Sales Charge (Load)	None
Maximum Deferred Sales Charge (Load)	None
Annual Low Balance Account Fee <i>(for accounts under \$1,000)</i>	\$15
Annual Fund Operating Expenses <i>(expenses that you pay each year as a percentage of the value of your investment)</i>	
Management Fees	0.10%
Distribution and/or Service (12b-1) Fees	0.25%
Other Expenses:	
Shareholder Servicing Fee	0.25%
Miscellaneous	0.21%
Total Annual Fund Operating Expenses	0.81%

Example: This example is intended to help you compare the cost of investing in the fund with the cost of investing in other mutual funds. The example assumes that you invest \$10,000 in the fund for the time periods indicated and then redeem all of your shares at the end of those periods. The example also assumes that your investment has a 5% return each year and the fund's operating expenses remain the same. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

	Class A
1 year	\$ 83
3 years	\$ 259
5 years	\$ 450
10 years	\$1,002

Principal Investment Strategies

Under normal market conditions, Tax Free Obligations Fund invests at least 80% of its total assets in high-quality, short-term municipal securities that pay interest that is exempt from federal income tax, including the federal alternative minimum tax. The municipal securities in which the fund invests may include variable rate demand notes, commercial paper, and municipal notes and other short-term municipal obligations.

Municipal securities are issued by state and local governments, and certain U.S. territorial possessions to finance public infrastructure projects such as streets and highways, schools, water and sewer systems, hospitals, and airports. They also may be issued to refinance outstanding obligations as well as to obtain funds for general operating expenses and for loans to other public institutions and facilities. There are two principal classifications of municipal securities:

- general obligation bonds, which are backed by the full faith, credit, and taxing power of the issuer.
- revenue bonds, which are payable only from the revenues generated by a specific project or from another specific revenue source.

Under normal market conditions, up to 20% of the fund's total assets may be invested in taxable money market securities and municipal securities subject to the alternative minimum tax. Under abnormal market conditions, however, the fund may invest more than 20% of its total assets in such taxable securities, as conditions dictate. This may prevent the fund from achieving its goal of providing maximum current income exempt from federal income taxes.

When selecting securities for the fund, the portfolio managers first consider general economic factors, market conditions, and the short-term interest rate environment in determining what types of short-term instruments to purchase. The portfolio managers then select the specific instruments to be purchased. Generally, the portfolio managers buy and hold securities until their maturities. However, the portfolio managers may sell securities for a variety of reasons, such as to adjust the portfolio's average maturity or to shift assets into and out of higher-yielding securities.

Tax Free Obligations Fund *continued*

Because the fund refers to tax-free investments in its name, it has a fundamental investment policy that it will normally invest in assets so that at least 80% of the income that it distributes will be exempt from federal regular income tax. This policy may not be changed without shareholder approval.

Principal Risks

An investment in the fund is not a deposit of U.S. Bank National Association and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other governmental agency. Although the fund seeks to preserve the value of your investment at \$1.00 per share, it is possible to lose money by investing in the fund.

Principal risks of investing in this fund include:

Credit Risk — The value of your investment might decline if the issuer of an obligation held by the fund defaults on the obligation or has its credit rating downgraded.

Income Risk — The level of income you receive from the fund will be affected by movements in short-term interest rates.

Interest Rate Risk — The value of your investment might decline because of a sharp rise in interest rates that causes the value of the fund's portfolio holdings to fall.

Liquidity Risk — The fund may not be able to sell a security in a timely manner or at a desired price, or may be unable to sell the security at all, because of a lack of demand in the market for the security, or a liquidity provider defaults on its obligation to purchase the security when properly tendered by the fund.

Municipal Security Risk — The value of municipal securities owned by the fund may be adversely affected by future changes in federal income tax laws, including rate reductions or the imposition of a flat tax, and adverse changes in the financial conditions of municipal securities issuers.

Redemption Risk — If there are unexpectedly high redemptions of fund shares, the fund might have to sell portfolio securities prior to their maturity, possibly at a loss.

Fund Performance

The following bar chart and table provide some indication of the potential risks of investing in the fund. The fund's past performance is not necessarily an indication of how the fund will perform in the future. Treasury Obligations Fund

Investment Objective

Treasury Obligations Fund's objective is to seek maximum current income consistent with the preservation of capital and maintenance of liquidity.

Fees and Expenses

The following tables describe the fees and expenses that you may pay if you buy and hold shares of the fund.

Shareholder Fees <i>(fees paid directly from your investment)</i>	Class A
Maximum Sales Charge (Load)	None
Maximum Deferred Sales Charge (Load)	None
Annual Low Balance Account Fee <i>(for accounts under \$1,000)</i>	\$15
Annual Fund Operating Expenses <i>(expenses that you pay each year as a percentage of the value of your investment)</i>	
Management Fees	0.10%
Distribution and/or Service (12b-1) Fees	0.25%
Other Expenses:	
Shareholder Servicing Fee	0.25%
Miscellaneous	0.18%
Total Annual Fund Operating Expenses	0.78%

Example: This example is intended to help you compare the cost of investing in the fund with the cost of investing in other mutual funds. The example assumes that you invest \$10,000 in the fund for the time periods indicated and then redeem all of your shares at the end of those periods. The example also assumes that your investment has a 5% return each year and the fund's operating expenses remain the same. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

	Class A
1 year	\$ 80
3 years	\$249
5 years	\$433
10 years	\$966

Principal Investment Strategies

Under normal market conditions, Treasury Obligations Fund invests at least 80% of its net assets, plus the amount of any borrowings for investment purposes, in short-term U.S. Treasury obligations, including repurchase agreements secured by U.S. Treasury obligations. The U.S. Treasury obligations in which the fund invests include U.S. Treasury bonds, notes, and bills. These types of Treasury securities are essentially the same except for differences in interest rates, maturities, and dates of issuance. U.S. Treasury obligations are backed by the full faith and credit of the U.S. government.

When selecting securities for the fund, the portfolio managers first consider general economic factors, market conditions, and the short-term interest rate environment in determining what types of short-term instruments to purchase. The portfolio managers then select the specific instruments to be purchased. Generally, the portfolio managers buy and hold securities until their maturities. However, the portfolio managers may sell securities for a variety of reasons, such as to adjust the portfolio's average maturity or to shift assets into and out of higher-yielding securities.

The fund may invest up to 20% of its net assets, plus the amount of any borrowings for investment purposes, in:

- obligations that are issued by private issuers and guaranteed under the Federal Deposit Insurance Corporation (FDIC) Temporary Liquidity Guarantee Program ("FDIC-guaranteed obligations") and
- repurchase agreements secured by FDIC-guaranteed obligations.

Treasury Obligations Fund *continued*

Principal Risks

An investment in the fund is not a deposit of U.S. Bank National Association and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other governmental agency. Although the fund seeks to preserve the value of your investment at \$1.00 per share, it is possible to lose money by investing in the fund.

Principal risks of investing in this fund include:

Credit Risk — The value of your investment might decline if the issuer of an obligation held by the fund defaults on the obligation or has its credit rating downgraded.

FDIC-Guaranteed Obligation Risk — Investments in FDIC-guaranteed obligations subject the fund to the additional risk that payments by the FDIC pursuant to its guarantee will be delayed from the date payments are due under the terms of the debt.

Income Risk — The level of income you receive from the fund will be affected by movements in short-term interest rates. Because the fund invests primarily in U.S. Treasury obligations and repurchase agreements secured by those securities, the fund may offer less income than money market funds investing in other high-quality money market securities.

Interest Rate Risk — The value of your investment might decline because of a sharp rise in interest rates that causes the value of the fund's portfolio holdings to fall.

Liquidity Risk — The fund may not be able to sell a security in a timely manner or at a desired price, or may be unable to sell the security at all, because of a lack of demand in the market for the security.

Redemption Risk — If there are unexpectedly high redemptions of fund shares, the fund might have to sell portfolio securities prior to their maturity, possibly at a loss.

Repurchase Agreement Risk — If the seller of a repurchase agreement defaults on its obligation to repurchase securities from the fund, the fund may incur costs in disposing of the collateral and may experience losses if there is any delay in its ability to do so.

Fund Performance

The following bar chart and table provide some indication of the potential risks of investing in the fund. The fund's past performance is not necessarily an indication of how the fund will perform in the future. Updated performance information is available online at firstamericanfunds.com or by calling 800 677-3863.

Annual Fund Operating Expenses <i>(expenses that you pay each year as a percentage of the value of your investment)</i>	
Management Fees	0.10%
Distribution and/or Service (12b-1) Fees	0.25%
Other Expenses:	
Shareholder Servicing Fee	0.25%
Miscellaneous	0.22%
Total Annual Fund Operating Expenses	0.82%

Example: This example is intended to help you compare the cost of investing in the fund with the cost of investing in other mutual funds. The example assumes that you invest \$10,000 in the fund for the time periods indicated and then redeem all of your shares at the end of those periods. The example also assumes that your investment has a 5% return each year and the fund's operating expenses remain the same. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

	Class A
1 year	\$ 84
3 years	\$ 262
5 years	\$ 455
10 years	\$1,014

Principal Investment Strategies

U.S. Treasury Money Market Fund invests exclusively in direct obligations of the U.S. Treasury and other money market funds that invest exclusively in such obligations. The U.S. Treasury obligations in which the fund invests include U.S. Treasury bonds, notes, and bills. These types of Treasury securities are essentially the same except for differences in interest rates, maturities, and dates of issuance. U.S. Treasury obligations are backed by the full faith and credit of the U.S. government.

When selecting securities for the fund, the portfolio managers first consider general economic factors, market conditions, and the short-term interest rate environment in determining what types of short-term instruments to purchase. The portfolio managers then select the specific instruments to be purchased. Generally, the portfolio managers buy and hold securities until their maturities. However, the portfolio managers may sell securities for a variety of reasons, such as to adjust the portfolio's average maturity or to shift assets into and out of higher-yielding securities.

Principal Risks

An investment in the fund is not a deposit of U.S. Bank National Association and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other governmental agency. Although the fund seeks to preserve the value of your investment at \$1.00 per share, it is possible to lose money by investing in the fund.

U.S. Treasury Money Market Fund *continued*

Principal risks of investing in this fund include:

Additional Expenses — If the fund invests in money market funds advised by another investment advisor, you will bear both your proportionate share of the expenses in the fund (including management and advisory fees) and, indirectly, the expenses of such other money market fund.

Income Risk — The level of income you receive from the fund will be affected by movements in short-term interest rates. Because the fund invests solely in U.S. Treasury obligations and other money market funds that invest exclusively in those obligations, the fund may offer less income than money market funds investing in other high-quality money market securities.

Interest Rate Risk — The value of your investment might decline because of a sharp rise in interest rates that causes the value of the fund's portfolio holdings to fall.

Liquidity Risk — The fund may not be able to sell a security in a timely manner or at a desired price, or may be unable to sell the security at all, because of a lack of demand in the market for the security.

Redemption Risk — If there are unexpectedly high redemptions of fund shares, the fund might have to sell portfolio securities prior to their maturity, possibly at a loss.

Other Information

For important information about the purchase and sale of fund shares, tax information, and financial intermediary compensation, please see "Additional Summary Information" on page 14 of the prospectus.

Purchase and Sale of Fund Shares

You may purchase or redeem shares of the funds on any business day. You can become a shareholder in any of the funds by making a minimum initial investment of \$2,500. The minimum additional investment is \$100. The funds reserve the right to waive or lower purchase minimums under certain circumstances and to reject any purchase order.

You can redeem shares through your financial intermediary or by contacting the funds at:

<u>Phone</u>	<u>Regular Mail</u>	<u>Overnight Express Mail</u>
800-677-3863	First American Funds P.O. Box 3011 Milwaukee, WI 53201-3011	First American Funds 615 East Michigan Street Milwaukee, WI 53202

Each fund reserves the right to suspend the right of shareholder redemption, or postpone the date of payment:

- if emergency conditions should exist, as specified in the Investment Company Act of 1940 (the "Investment Company Act"), or as determined by the Securities and Exchange Commission (SEC), as a result of which disposal of portfolio securities or determination of the net asset value (NAV) of the fund is not reasonably practicable;
- for any period during which trading on the New York Stock Exchange (NYSE) is restricted as determined by the SEC or the NYSE is closed (other than customary weekend and holiday closings); or
- for such other periods as the SEC may by order permit for the protection of shareholders of the fund.

In addition, in the unlikely event that the funds' board of directors were to determine pursuant to SEC regulations that the extent of the deviation between a fund's amortized cost per share and its market-based NAV per share may result in material dilution or other unfair results to shareholders, the board will cause the fund to take such action as it deems appropriate to eliminate or reduce to the extent practicable such dilution or unfair results, including suspending redemption of shares and liquidating the fund under Rule 22e-3 of the Investment Company Act.

Tax Information

For Government Obligations Fund, Prime Obligations Fund, Treasury Obligations Fund, and U.S. Treasury Money Market Fund, dividends you receive from the funds are generally taxable as ordinary income. Dividends attributable to income from U.S. government securities may be exempt from state personal income taxes.

Tax Free Obligations Fund intends to pay interest that is exempt from federal income tax, including the federal alternative minimum tax, although a portion of the fund's distributions may not be tax-exempt.

Payments to Broker-Dealers and Other Financial Intermediaries

If you purchase a fund through a broker-dealer or other financial intermediary (such as a bank), the fund and its related companies may pay the intermediary for the sale of fund shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the fund over another investment. Ask your salesperson or visit your financial intermediary's website for more information.

Investment Objectives

The funds' objectives are described in the "Fund Summaries" section. Please remember, there is no guarantee that any fund will achieve its objective.

Investment Strategies

The funds' principal investment strategies are discussed in the "Fund Summaries" section. These are the strategies that the funds' investment advisor believes are most likely to be important in trying to achieve the funds' objectives. You should be aware that each fund may also use strategies and invest in securities that are not described in this prospectus, but that are described in the SAI. For a copy of the SAI, call Investor Services at 800 677-3863.

U.S. Government Agency Securities

U.S. government securities issued by the Federal National Mortgage Association (Fannie Mae), Federal Home Loan Mortgage Corporation (Freddie Mac) and the Federal Home Loan Banks (FHLB) are neither issued nor guaranteed by the U.S. Treasury and are not backed by the full faith and credit of the United States. These entities, however, were chartered or supported by Acts of Congress and are supported by federal subsidies, loans or other benefits. The Government National Mortgage Association (Ginnie Mae) is a wholly-owned U.S. corporation that is authorized to guarantee timely payment and interest of its securities. U.S. government securities issued by Ginnie Mae are guaranteed by the full faith and credit of the United States. Other U.S. government securities do not have an explicit guarantee but support is implied due to the government sponsorship of their mandated activities, including securities issued by the Tennessee Valley Authority and Federal Farm Credit Banks.

Other Money Market Funds

In addition to the securities specified in the "Fund Summaries" section, each fund may invest in other money market funds that invest in the same types of securities as the respective fund, including each of the other money market funds advised by the funds' investment advisor. To avoid duplicative investment advisory fees, when a fund invests in another money market fund advised by the fund's investment advisor, the investment advisor reimburses the fund an amount equal to the fund's proportionate share of the investment advisory fee paid by the other money market fund to the investment advisor. If the fund invests in money market funds advised by another investment advisor, you will bear both your proportionate share of the expenses in the fund (including management and advisory fees) and, indirectly, the expenses of such other money market fund.

Securities Lending

To generate additional income, each fund other than U.S. Treasury Money Market Fund may lend securities representing up to one-third of the value of its total assets to broker-dealers, banks, and other institutions deemed by the fund's advisor to present minimal credit risk. When a fund loans its portfolio securities, it will receive, at the inception of each loan, cash collateral equal to at least 102% of the value of the loaned securities, which is invested consistent with the fund's investment strategies. If the borrower fails to return the loaned securities, the fund could suffer a loss if the value of the invested collateral is insufficient to purchase replacement securities.

Temporary Defensive Position

For liquidity and to respond to unusual market conditions, the funds may hold all or a significant portion of their total assets in cash for temporary defensive purposes. This may result in a lower yield and prevent the funds from meeting their investment objectives.

Investment Approach

Each fund complies with SEC regulations that apply to money market funds. These regulations require that each fund's investments mature within 397 days from the date of purchase and that each fund maintain a weighted average maturity of 60 days or less and a weighted average life of 120 days or less. The funds may invest in securities with variable or floating interest rates and securities with demand features. The maturities of these securities are determined according to regulations which allow the funds to consider some of these securities as having maturities shorter than their stated maturity dates. All of the funds' investments must be in U.S. dollar-denominated high quality securities which have been determined by the funds' advisor to present minimal credit risk and are rated in one of the two highest rating categories by one or more nationally recognized statistical rating organizations (NRSROs) or are deemed by the advisor to be of comparable quality to securities having such ratings. In addition, no more than 3% of each fund's total assets may be invested in securities rated in the second highest rating category by an NRSRO or deemed to be of comparable by the fund's advisor at the time of purchase ("second-tier securities"). With limited exceptions, a fund may not invest more than 5% of its total assets in securities issued by the same issuer. Each fund is further limited to investing no more than ½ of 1% in second-tier securities of any issuer. Each fund must comply with weekly liquidity standards that require a fund to hold at least 30% of its total assets in cash, direct obligations of the U.S. Government, agency discount notes with remaining maturities of 60 days or less, or securities convertible into cash within five business days. Each fund, other than Tax Free Obligations Fund, must also comply with daily liquidity

Investment Approach *continued*

standards that require a fund to hold at least 10% of its total assets in cash, direct obligations of the U.S. Government, or securities convertible into cash within one business day. Each fund is limited to investing no more than 5% of its total assets in illiquid securities.

Investment Risks

The principal risks of investing in each fund are identified in the “Fund Summaries” section. Certain risks are further described below.

Foreign Security Risk. The foreign securities in which Prime Obligations Fund may invest, although dollar-denominated, may present some additional risk. Political or social instability or diplomatic developments could adversely affect the securities. There is also the risk of possible withholding taxes, seizure of foreign deposits, currency controls, interest limitations, or other governmental restrictions which might affect the payment of principal or interest on securities owned by the fund. In addition, there may be less public information available about foreign corporations and foreign banks and their branches.

Disclosure of Portfolio Holdings

A description of the funds’ policies and procedures with respect to the disclosure of the funds’ portfolio securities is available in the funds’ SAI.

Investment Advisor

FAF Advisors, Inc.
800 Nicollet Mall
Minneapolis, MN 55402

FAF Advisors provides investment management services to individuals and institutions, including corporations, foundations, pensions, and retirement plans. As of September 30, 2010, FAF Advisors had more than \$84 billion in assets under management, including investment company assets of more than \$67 billion. As investment advisor, FAF Advisors manages the funds' business and investment activities, subject to the authority of the funds' board of directors.

Each fund pays the investment advisor a monthly management fee for providing investment advisory services. The table below reflects management fees paid to the investment advisor, after taking into account any fee waivers, for the funds' most recently completed fiscal year.

	Management fee as a % of average daily net assets
Government Obligations Fund	0.10%
Prime Obligations Fund	0.10%
Tax Free Obligations Fund	0.10%
Treasury Obligations Fund	0.10%
U.S. Treasury Money Market Fund	0.03%

FAF Advisors may voluntarily waive or reimburse certain fees and expenses in order to maintain a zero or positive yield for each share class of each fund. These waivers and reimbursements may be terminated at any time by FAF Advisors.

A discussion regarding the basis for the board's approval of the funds' investment advisory agreement appears in the funds' annual report to shareholders for the fiscal year ended August 31, 2010.

Additional Compensation

FAF Advisors, U.S. Bank National Association (U.S. Bank) and other affiliates of U.S. Bancorp may act as fiduciary with respect to plans subject to the Employee Retirement Income Security Act of 1974 (ERISA) and other trust and agency accounts that invest in the First American funds. As described above, FAF Advisors receives compensation for acting as the funds' investment advisor. FAF Advisors, U.S. Bank and their affiliates also receive compensation from the funds as set forth below.

Administration Services. FAF Advisors and its affiliate, U.S. Bancorp Fund Services, LLC (Fund Services), act as the funds' administrator and sub-administrator, respectively, providing administration services that include general administrative and accounting services, blue sky services and shareholder services. For such services, each fund pays FAF Advisors the fund's pro rata portion of up to 0.20%, on an annual basis, of the aggregate average daily net assets attributable to Class A shares of all open-end funds in the First American family of funds other than the series of First American Strategy Funds, Inc. FAF Advisors pays Fund Services a portion of its fee, as agreed to from time to time. In addition to these fees, the funds may reimburse FAF Advisors for any out-of-pocket expenses incurred in providing administration services.

Custody Services. U.S. Bank provides custody services to each fund. U.S. Bank is paid monthly fees equal, on an annual basis, to 0.005% of each fund's average daily net assets.

Distribution Services. Quasar Distributors, LLC, an affiliate of FAF Advisors, receives distribution and shareholder servicing fees for acting as the funds' distributor.

Securities Lending Services. In connection with lending their portfolio securities, the funds pay fees to U.S. Bank of 25% of each fund's net income from securities lending transactions and U.S. Bank pays half of such fees to FAF Advisors for certain securities lending services provided by FAF Advisors.

Shareholder Servicing Fees. Each fund pays FAF Advisors a shareholder servicing fee at an annual rate of 0.25% of its average daily net assets attributable to Class A shares for providing or arranging for the provision of shareholder services to the holders of its Class A shares.

Transfer Agency Services. Fund Services provides transfer agency and dividend disbursing services, as well as certain shareholder services, to the funds. Fund Services receives fees for transfer agency and dividend disbursing services on a per shareholder account basis, subject to a minimum fee per share class. In addition, the funds may reimburse Fund Services for any out-of-pocket expenses incurred in providing transfer agency services.

Investment Advisor *continued*

Other Compensation. To the extent that fund shares are held through U.S. Bank or its broker-dealer affiliate, U.S. Bancorp Investments, Inc., those entities may receive distribution and/or shareholder servicing fees from the funds' distributor as well as other payments from the funds' distributor and/or advisor as described below under "Shareholder Information — Additional Payments to Institutions."

Portfolio Managers

The funds are managed by a team of persons associated with FAF Advisors.

Pricing of Fund Shares

You may purchase or redeem shares of the funds on any business day that the Federal Reserve Bank of New York (Federal Reserve) is open, except as noted below. In addition to weekends, the Federal Reserve is closed on the following Federal holidays: New Year's Day, Martin Luther King, Jr. Day, Presidents' Day, Memorial Day, Independence Day, Labor Day, Columbus Day, Veterans Day, Thanksgiving Day, and Christmas Day. A fund may close when the Federal Reserve is open and the NYSE is closed, such as Good Friday. On any business day when the Securities Industry Financial Markets Association recommends that the bond markets close trading early, a fund may also close trading early.

Your purchase or redemption price will be based on that day's NAV per share if your order is received by the funds in proper form prior to the time the fund calculates its NAV. See "Additional Information on Purchasing, Redeeming, and Exchanging Fund Shares — Calculating Net Asset Value" below. Contact your investment professional or financial institution to determine the time by which it must receive your order to be assured same day processing. To make sure your order is in proper form, you must follow the instructions set forth below under "Purchasing Fund Shares" and "Redeeming Fund Shares."

Some investment professionals or financial institutions may charge a fee for helping you purchase, redeem, or exchange shares. Contact your investment professional or financial institution for more information. No such fee will be imposed if you purchase shares directly from the funds.

Share Classes

The funds issue their shares in multiple classes. This prospectus offers Class A shares.

Class A shares are offered at net asset value with no front-end or contingent deferred sales charge, but with an annual distribution (12b-1) fee of 0.25% and an annual shareholder servicing fee of 0.25%.

12b-1 Fees

Each fund has adopted a plan pursuant to Rule 12b-1 under the Investment Company Act that allows the fund to pay its distributor an annual fee for the distribution and sale of its shares and/or for services provided to shareholders. The 12b-1 fees are equal to 0.25% of the average daily net assets of Class A shares.

Because these fees are paid out of a fund's assets on an ongoing basis, over time these fees will increase the cost of your investment and may cost you more than paying other types of sales charges.

The Class A share 12b-1 fee is a distribution fee. The funds' distributor uses the distribution fee to compensate investment professionals or financial institutions for providing distribution-related services to the funds.

Your investment professional or financial institution will continue to receive Rule 12b-1 fees relating to your shares for as long as you hold those shares.

The Board of Directors has approved the suspension or reduction of 12b-1 fee payments by each fund as needed in order to maintain a yield for each share class of at least 0%. Any such suspension or reduction will result in a corresponding suspension or reduction of amounts paid by the fund's distributor to investment professionals and financial institutions.

Shareholder Servicing Plan

Each fund also has adopted a non-Rule 12b-1 shareholder servicing plan and agreement with respect to the Class A shares. Under this plan and agreement, each fund pays FAF Advisors a shareholder servicing fee at an annual rate of 0.25% of average daily Class A share net assets for providing or arranging for the provision of shareholder services to the holders of Class A shares. No distribution-related services are provided under this plan and agreement.

Determining Your Share Price

Because the current prospectus and SAI are available on First American Funds' website free of charge, we do not disclose the following share class information separately on the website.

Your purchase price for Class A shares is their net asset value.

Purchasing Fund Shares

To help the government fight the funding of terrorism and money laundering activities, Federal law requires all financial institutions to obtain, verify, and record information that identifies each person who opens an account. As a result, when you open an account, we will ask for your name, permanent street address, date of birth, and social security or taxpayer identification number. Addresses containing a P.O. Box only will not be accepted. We may also ask for other identifying documents or information.

You may become a shareholder in any of the funds by making a minimum initial investment of \$2,500. The minimum additional investment is \$100. The funds reserve the right to waive or lower purchase minimums under certain circumstances and to reject any purchase order.

Until further notice, new investors may not purchase Class A shares directly from the funds. During this time, new investors may only purchase Class A shares through an investment professional or financial institution that has a selling arrangement with the funds' distributor.

By Phone. You may purchase shares by calling your investment professional or financial institution, if they have a sales agreement with the funds' distributor.

You may also purchase shares by calling Investor Services and making a wire transfer or an Automated Clearing House (ACH) transaction from your bank. Before making an initial investment by wire or ACH, you must submit a new account form to the funds and select this option. Be sure to include a cancelled check or pre-printed deposit slip with the form. Once the account is established, you may request the account number and wiring instructions from Investor Services by calling 800 677-3863. Purchases may then be made by wire transfer or ACH by calling the same number. All information will be taken over the telephone, and your order will be priced at the next NAV calculated after the funds' custodian receives your payment by wire or ACH.

You cannot purchase shares by wire or ACH on days when federally chartered banks are closed.

By Mail. To purchase shares by mail, simply complete and sign a new account form, enclose a check made payable to the fund you wish to invest in, and mail both to:

Regular U.S. Mail:

First American Funds
P.O. Box 3011
Milwaukee, WI 53201-3011

Overnight Express Mail:

First American Funds
615 East Michigan Street
Milwaukee, WI 53202

After you have established an account, you may continue to purchase shares by mailing your check to First American Funds at the same address.

Please note the following:

- All purchases must be drawn on a bank located within the United States and payable in U.S. dollars to First American Funds.
- Cash, money orders, cashier's checks in amounts less than \$10,000, third-party checks, Treasury checks, credit card checks, traveler's checks, starter checks, and credit cards will not be accepted. We are unable to accept post-dated checks, post-dated online bill pay checks, or any conditional order as payment.
- If a check or ACH transaction does not clear your bank, the funds reserve the right to cancel the purchase, and you may be charged a fee of \$25 per check or transaction. You could be liable for any losses or fees incurred by the fund as a result of your check or ACH transaction failing to clear.

By Systematic Investment Plan. To purchase shares as part of a savings discipline, you may add to your investment on a regular basis by having \$100 or more automatically withdrawn from your bank account on a periodic basis and invested in fund shares. You may apply for participation in this program through your investment professional or financial institution or by calling Investor Services at 800 677-3863.

Redeeming Fund Shares

When you redeem shares, the proceeds are normally sent on the next business day, but in no event more than seven days, after your request is received in proper form.

By Phone. If you purchased shares through an investment professional or financial institution, simply call them to redeem your shares.

If you did not purchase shares through an investment professional or financial institution, you may redeem your shares by calling Investor Services at 800 677-3863. Proceeds can be wired to your bank account (if you have previously supplied your bank account information to the fund) or sent to you by check. The funds charge a \$15 fee for wire redemptions, but have the right to waive this fee for shares redeemed through certain financial intermediaries and by certain accounts. Proceeds also can be sent directly to your bank or brokerage account via electronic funds transfer if your bank or brokerage firm is a member of the ACH network. The funds reserve the right to limit telephone redemptions to \$50,000 per account per day.

Redeeming Fund Shares *continued*

If you recently purchased your shares by check or through the ACH network, proceeds from the sale of those shares may not be available until your check or ACH payment has cleared, which may take up to 15 calendar days from the date of purchase.

By Mail. To redeem shares by mail, send a written request to your investment professional or financial institution, or to the fund at the following address:

Regular U.S. Mail:

First American Funds
P.O. Box 3011
Milwaukee, WI 53201-3011

Overnight Express Mail:

First American Funds
615 East Michigan Street
Milwaukee, WI 53202

Your request should include the following information:

- name of the fund
- account number
- dollar amount or number of shares redeemed
- name on the account
- signatures of all registered account owners

After you have established your account, signatures on a written request must be guaranteed if:

- you would like redemption proceeds to be paid to any person, address, or bank account other than that on record.
- you would like the redemption check mailed to an address other than the address on the fund's records, or you have changed the address on the fund's records within the last 30 days.
- your redemption request is in excess of \$50,000.
- bank information related to an automatic investment plan, telephone purchase or telephone redemption has changed.
- you intend to change legal ownership of your account.

In addition to the situations described above, the funds reserve the right to require a signature guarantee, or another acceptable form of signature verification, in other instances based on the circumstances of a particular situation.

A signature guarantee assures that a signature is genuine and protects shareholders from unauthorized account transfers. Banks, savings and loan associations, trust companies, credit unions, broker-dealers, and member firms of a national securities exchange may guarantee signatures. Call your financial intermediary to determine if it has this capability. A notary public is not an acceptable signature guarantor.

Proceeds from a written redemption request will be sent to you by check unless another form of payment is requested.

By Checking Account. You may sign up for check writing privileges when you complete a new account form, or by calling your investment professional, financial institution, or the funds. With a fund checking account, you may redeem shares simply by writing a check for \$100 or more. The funds may charge a \$25 fee for draft checks written against insufficient funds and requests to stop payment on a check. Call Investor Services at 800 677-3863 for more information.

Please note that you may not use a check to close your account.

By Systematic Withdrawal Plan. If your account has a value of \$5,000 or more, you may redeem a specific dollar amount from your account on a regular basis. You may set up a systematic withdrawal when you complete a new account form or by calling your investment professional or financial institution.

Exchanging Fund Shares

On July 29, 2010, FAF Advisors and U.S. Bank entered into an agreement with Nuveen Investments, Inc. ("Nuveen") and certain Nuveen affiliates to sell a portion of FAF Advisors' asset management business. Included in the sale will be that part of FAF Advisors' asset management business that advises the First American equity, fixed income, and asset allocation open-end funds (the "First American/Nuveen funds"). FAF Advisors will continue to serve as investment advisor to the First American money market funds after the sale. The sale is subject to the satisfaction of customary conditions, and is currently expected to close by the end of 2010.

Effective at the close of the sale, First American money market fund shareholders will no longer be allowed to exchange their shares for shares of the First American/Nuveen funds. In order to purchase shares of the First American/Nuveen funds with proceeds from the sale of First American money market fund shares, you will have to sell your First American money market fund shares and separately arrange for the purchase of shares of the First American/Nuveen funds through your financial intermediary or directly through Nuveen. After the close, you will still be allowed to exchange from one First American money market fund to another First American money market fund.

Exchanging Fund Shares *continued*

Exchanges may be made only on days when the NYSE is open. There is no fee to exchange shares.

Generally, you may exchange your shares only for the same class of shares of the other fund. Exchanges are made based on the net asset value per share of each fund at the time of the exchange. When you exchange your Class A shares for Class A shares of another First American fund, you will have to pay the sales charge imposed by the fund into which you are exchanging, unless your money market fund shares were originally issued in exchange for shares of a fund that had a sales charge.

Before exchanging into any fund, be sure to read its prospectus carefully. A fund may change or cancel its exchange policies at any time upon notice to shareholders, which may be given by means of a new or supplemented prospectus. The funds have the right to limit exchanges that are deemed to constitute short-term trading. See “Additional Information on Purchasing, Redeeming, and Exchanging Fund Shares — Excessive Trading of Fund Shares” below.

The First American money market funds also are offered as money market exchange vehicles for certain other mutual fund families that have entered into agreements with the funds’ distributor. If you are using one of the funds as such an exchange vehicle, you may exchange your shares only for shares of the funds in that other mutual fund family; you may not exchange your shares for shares of another First American fund. You may be assessed certain transactional or service fees by your original mutual fund family in connection with any such exchange. If you have any questions regarding the amount of fees assessed per transaction, please call the toll-free number on your statement.

By Phone. If both funds have identical shareholder registrations, you may exchange shares by calling your investment professional, your financial institution, or by calling the funds directly at 800 677-3863.

By Mail. To exchange shares by written request, please follow the procedures under “Redeeming Fund Shares” above. Be sure to include the names of both funds involved in the exchange.

By Systematic Exchange Plan. You may make automatic exchanges on a regular basis of your Class A shares for the same class of shares of another First American fund. Investing a fixed dollar amount at regular intervals, sometimes referred to as “dollar cost averaging,” may have the effect of reducing the average cost per share of the fund acquired. You may apply for participation in this program through your investment professional or financial institution, or by calling Investor Services at 800 677-3863.

Additional Information on Purchasing, Redeeming, and Exchanging Fund Shares

Calculating Net Asset Value

The funds generally calculate their NAV per share as of the time specified in the table below on each business day that the funds are open, except that the NAV for Government Obligations Fund, Prime Obligations Fund and Treasury Obligations Funds is generally calculated at 1:00 p.m. Central time on days on which the bond markets close early (typically on the business day preceding a Federal holiday) (an “Early Close”). Purchase and redemption orders received after closing time, including an Early Close, will be processed the next business day.

	Deadline for orders to be received in order to receive the current day’s NAV
Government Obligations Fund	3:30 p.m. Central time
Prime Obligations Fund	3:30 p.m. Central time
Tax Free Obligations Fund	11:30 a.m. Central time
Treasury Obligations Fund	3:30 p.m. Central time
U.S. Treasury Money Market Fund	12:00 p.m. Central time

A fund’s NAV is equal to the market value of its investments and other assets, less any liabilities, divided by the number of fund shares. The securities held by the funds are valued on the basis of amortized cost. This involves valuing an instrument at its cost and thereafter assuming a constant amortization of any discount or premium until the instrument’s maturity, rather than looking at actual changes in the market value of the instrument. Each fund’s net asset value is normally expected to be \$1 per share.

Excessive Trading of Fund Shares

In general, funds in the First American fund family discourage short-term trading or frequent purchases and redemptions of their shares. The funds’ board of directors has adopted policies and procedures designed to detect and deter trading in First American fund shares that may be

Additional Information on Purchasing, Redeeming, and Exchanging Fund Shares *continued*

disadvantageous to fund shareholders. Frequent purchases and redemptions of fund shares can harm shareholders in various ways, including reducing the returns to long-term shareholders by increasing fund expenses and disrupting portfolio investment strategies. In addition, short-term traders may seek to take advantage of possible delays between the change in the value of a fund's portfolio holdings and the reflection of that change in the net asset value of the fund's shares, to the disadvantage of other shareholders. This latter danger does not apply to money market funds, which attempt to maintain a stable net asset value of \$1.00 per share. In addition, the money market funds in the First American fund family are designed to offer investors a liquid cash option and it is anticipated that shareholders will purchase and redeem these shares on a frequent basis. Accordingly, the policies and procedures adopted by the board do not discourage short-term trading or frequent purchases and redemptions of money market fund shares and each money market fund accommodates frequent trading.

Telephone Transactions

You may purchase, redeem, or exchange shares by telephone, unless you elected on your new account form to restrict this privilege. If you wish to reinstate this option on an existing account, please call Investor Services at 800 677-3863 to request the appropriate form.

The funds and their agents will not be responsible for any losses that may result from acting on wire or telephone instructions that they reasonably believe to be genuine. The funds and their agents will each follow reasonable procedures to confirm that instructions received by telephone are genuine, which may include recording telephone conversations.

Once a telephone transaction has been placed, it generally cannot be canceled or modified.

It may be difficult to reach the funds by telephone during periods of unusual market activity. If you are unable to reach the funds or their agents by telephone, please consider sending written instructions.

Accounts with Low Balances

Each fund reserves the right to liquidate or assess a low balance fee to any account holding a balance that is less than the account balance minimum of \$1,000 for any reason, including market fluctuation.

If a fund elects to liquidate or assess a low balance fee, then annually, on or about the second Wednesday of August, the fund will assess a \$15 low balance account fee to certain retirement accounts, education savings plans, and UGMA/UTMA accounts that have balances under the account balance minimum. At the same time, other accounts with balances under the account balance minimum will be liquidated, with proceeds being mailed to the address of record. Prior to the assessment of any low balance fee or liquidation of low balance accounts, affected shareholders will receive a communication reminding them of the pending action, thereby providing time to ensure that balances are at or above the account balance minimum prior to any fee assessment or account liquidation.

An intermediary may apply its own procedures in attempting to comply with the funds' low balance account policy.

Dividends and Distributions

Dividends from a fund's net investment income are declared daily and paid monthly. If a fund receives your wire transfer payment for fund shares by the time the fund determines its NAV, you will begin to accrue dividends on that day. If you place an exchange order for fund shares by the time the fund determines its NAV, you will begin to accrue dividends on the next business day. In the case of shares purchased by check, because money market instruments must be purchased with federal funds and it takes a money market mutual fund one business day to convert check proceeds into federal funds, you will begin to accrue dividends on the first business day after the fund receives your check (provided your check is received by the time the fund determines its NAV). If you redeem shares and your request is received by the time the fund determines its NAV, you will receive a dividend on the day of your redemption request if the fund pays your redemption proceeds by check, but you will not receive a dividend on the day of your redemption request if the fund pays your redemption proceeds by wire.

Dividends will be reinvested in additional shares of the same fund, unless you request that distributions be reinvested in another First American fund or paid in cash. This request may be made on your new account form, by contacting your financial institution, or by calling Investor Services at 800 677-3863. If you request that your distributions be paid in cash but those distributions cannot be delivered because of an incorrect mailing address, or if a distribution check remains uncashed for six months, the undelivered or uncashed distributions and all future distributions will be reinvested in fund shares at the current NAV.

Taxes

Some of the tax consequences of investing in the funds are discussed below. More information about taxes is in the SAI. However, because everyone's tax situation is unique, always consult your tax professional about federal, state, and local tax consequences.

For Government Obligations Fund, Prime Obligations Fund, Treasury Obligations Fund, and U.S. Treasury Money Market Fund, dividends you receive from the funds are generally taxable as ordinary income, whether you reinvest them or take them in cash. Dividends attributable to income from U.S. government securities may be exempt from state personal income taxes. Dividends from the funds will not be eligible for the maximum 15% tax rate that applies to "qualified dividend income."

Tax Free Obligations Fund intends to meet certain federal tax requirements so that distributions of tax-exempt interest income may be treated as "exempt-interest dividends." These dividends are not subject to regular federal tax. However, although it has no current intention of doing so, the fund may invest up to 20% of its net assets in municipal securities the interest on which is subject to the federal alternative minimum tax. Any portion of exempt-interest dividends attributable to interest on these securities may increase some shareholders' alternative minimum tax.

Additional Payments to Institutions

The advisor and/or the distributor may pay additional compensation to investment professionals, participating institutions and "one-stop" mutual fund networks (collectively, "institutions") out of their own resources in connection with the sale or retention of fund shares and/or in exchange for sales and/or administrative services performed on behalf of the institution's customers. The amounts of these payments may be significant, and may create an incentive for the institution or its employees or associated persons to recommend or sell shares of the funds to you. These payments are not reflected in the fees and expenses listed in the "Fund Summaries" section of the prospectus because they are not paid by the funds.

These payments are negotiated and may be based on such factors as the number or value of First American fund shares that the institution sells or may sell; the value of the assets invested in the First American funds by the institution's customers; reimbursement of ticket or operational charges (fees that an institution charges its representatives for effecting transactions in fund shares); lump sum payment for services provided; the type and nature of services or support furnished by the institution; and/or other measures as determined from time to time by the advisor and/or distributor.

The advisor and/or distributor may make other payments or allow other promotional incentives to institutions to the extent permitted by SEC and FINRA rules and by other applicable laws and regulations. Certain institutions also receive payments in recognition of sub-accounting or other services they provide to shareholders or plan participants who invest in the funds or other First American Funds through their retirement plan.

You can ask your institution for information about any payments it receives from the advisor and/or the distributor and from the funds, and any services your institution provides, as well as about fees and/or commissions your institution charges. You can also find more details about payments made by the advisor and/or the distributor in the funds' SAI.

Staying Informed

Shareholder Reports

Shareholder reports are mailed twice a year, in October and April. They include financial statements and performance information, and, on an annual basis, the report of independent registered public accounting firm.

In an attempt to reduce shareholder costs and help eliminate duplication, the funds will try to limit their mailings to one report for each address that lists one or more shareholders with the same last name. If you would like additional copies, please call Investor Services at 800 677-3863.

Statements and Confirmations

Statements summarizing activity in accounts held directly with the funds are mailed quarterly. Confirmations generally are mailed following each non-systematic purchase or sale of fund shares. Generally, the funds do not send statements for shares held in a brokerage account. Please review your statements and confirmations as soon as you receive them and promptly report any discrepancies to your financial intermediary or to Investor Services at 800 677-3863.

Financial Highlights

The tables that follow present performance information about the Class A shares of each fund. This information is intended to help you understand each fund's financial performance for the past five years. Some of this information reflects financial results for a single fund share held throughout the period. Total returns in the tables represent the rate that you would have earned or lost on an investment in the fund, assuming you reinvested all of your dividends and distributions.

The information below has been derived from the financial statements audited by Ernst & Young LLP, an independent registered public accounting firm, whose report, along with the funds' financial statements, is included in the funds' annual report, which is available upon request.

Government Obligations Fund

Class A Shares	Fiscal year ended August 31,				
	2010	2009	2008	2007	2006
Per Share Data					
Net Asset Value, Beginning of Period	\$ 1.00	\$ 1.00	\$ 1.00	\$ 1.00	\$ 1.00
Net Investment Income	—	0.004	0.028	0.046	0.038
Dividends (from net investment income)	—	(0.004)	(0.028)	(0.046)	(0.038)
Net Asset Value, End of Period	\$ 1.00	\$ 1.00	\$ 1.00	\$ 1.00	\$ 1.00
Total Return ¹	0.00%	0.36%	2.79%	4.66%	3.86%
Ratios/Supplemental Data					
Net Assets, End of Period (000)	\$295,439	\$ 530,312	\$ 710,680	\$ 384,673	\$ 429,573
Ratio of Expenses to Average Net Assets	0.27%	0.67%	0.75%	0.75%	0.75%
Ratio of Net Investment Income to Average Net Assets	0.00%	0.31%	2.58%	4.56%	3.96%
Ratio of Expenses to Average Net Assets (excluding waivers)	0.78%	0.79%	0.78%	0.78%	0.80%
Ratio of Net Investment Income to Average Net Assets (excluding waivers)	(0.51)%	0.19%	2.55%	4.53%	3.91%

¹ Total return would have been lower had certain expenses not been waived.

Prime Obligations Fund

Class A Shares	Fiscal year ended August 31,				
	2010	2009	2008	2007	2006
Per Share Data					
Net Asset Value, Beginning of Period	\$ 1.00	\$ 1.00	\$ 1.00	\$ 1.00	\$ 1.00
Net Investment Income	—	0.007	0.031	0.046	0.038
Dividends (from net investment income)	—	(0.007)	(0.031)	(0.046)	(0.038)
Net Asset Value, End of Period	\$ 1.00	\$ 1.00	\$ 1.00	\$ 1.00	\$ 1.00
Total Return ¹	0.00%	0.67% ²	3.17% ²	4.70%	3.88%
Ratios/Supplemental Data					
Net Assets, End of Period (000)	\$1,324,087	\$1,676,718	\$2,315,088	\$2,048,485	\$1,707,450
Ratio of Expenses to Average Net Assets	0.33%	0.76%	0.78%	0.78%	0.78%
Ratio of Net Investment Income to Average Net Assets	0.00%	0.71%	3.08%	4.60%	3.81%
Ratio of Expenses to Average Net Assets (excluding waivers)	0.78%	0.81%	0.78%	0.78%	0.79%
Ratio of Net Investment Income to Average Net Assets (excluding waivers)	(0.45)%	0.66%	3.08%	4.60%	3.80%

¹ Total return would have been lower had certain expenses not been waived.

² On October 7, 2008, an affiliate of the advisor purchased a receivable that was on the fund's books as a result of its redemption of shares of the Primary Fund, a series of the Reserve Fund. This purchase, which was made at \$1.00 per share plus accrued interest, had an impact on total return of less than 0.01%.

Tax Free Obligations Fund

Class A Shares	Fiscal year ended August 31,				
	2010	2009	2008	2007	2006
Per Share Data

¹ Total return would have been lower had certain expenses not been waived.

First American Funds' Privacy Policy

We want you to understand what information we collect and how it's used.

"Nonpublic personal information" is nonpublic information that we obtain while providing financial products or services to you.

Why we collect your information

We gather nonpublic personal information about you and your accounts so that we can:

- Know who you are and prevent unauthorized access to your information.
- Comply with the laws and regulations that govern us.

The types of information we collect

We may collect the following nonpublic personal information about you:

- Information about your identity, such as your name, address, and social security number.
- Information about your transactions with us.
- Information you provide on applications, such as your beneficiaries and banking information, if provided to us.

Confidentiality and security

We require our service providers to restrict access to nonpublic personal information about you to those employees who need that information in order to provide products or services to you. We also require them to maintain physical, electronic, and procedural safeguards that comply with applicable federal standards and regulations to guard your information.

What information we disclose

We may share all of the nonpublic personal information that we collect about you with our affiliated providers of financial services, including our family of funds and their advisor, and with companies that perform marketing services on our behalf.

We're permitted by law to disclose nonpublic personal information about you to other third parties in certain circumstances. For example, we may disclose nonpublic personal information about you to affiliated and nonaffiliated third parties to assist us in servicing your account (e.g., mailing of fund-related materials) and to government entities (e.g., IRS for tax purposes).

We'll continue to adhere to the privacy policies and practices described here even after your account is closed or becomes inactive.

Additional rights and protections

You may have other privacy protections under applicable state laws. To the extent that these state laws apply, we will comply with them when we share information about you. This privacy policy does not apply to your relationship with other financial service providers, such as broker-dealers. We may amend this privacy notice at any time, and we will inform you of changes as required by law.

Our pledge applies to products and services offered by:
